

MEDICAL IDENTITY THEFT POLICY

Patients will be asked to provide government issued photo identification (for example, driver's license, passport, retired or active duty military ID) at the time of service. If you do not have government issued photo identification, two forms of non-photo identification are required, one of which is from a government agency (for example, social security card, Medicaid card, or Medicare card plus current utility bill, current bank statement, current pay stub, work identification or school identification). If you do not have government-issued photo identification, the Dental School will take your photo after you have provided two forms of non-photo identification and include the photo in your dental health record. Once your photo is taken, you will not need to bring the two forms of non-photo identification to each appointment.
