

## **POLICY FOR BASIC LIFE SUPPORT RECOGNITION**

It is the policy of the School of Dentistry that all students, faculty, and staff who are involved in the direct provision of patient care be continuously recognized in basic life support, including cardiopulmonary resuscitation. This also pertains to those staff members who function as front desk personnel in both the Adult and Pediatric Clinics. All other School of Dentistry personnel who are not required to be continuously recognized in basic life support are encouraged to do so and opportunities will be made to them for this purpose. The Department of Community and Preventive Dentistry will manage the certification of students and the Office of the Assistant / Associate Dean for Academic Affairs will direct the certification of appropriate faculty and staff.
