

Dear Creighton Dental School Patients,

On August 15, we will resume full operation of our dental clinic. Due to ongoing construction at the adjacent Creighton University Medical Center, there will be changes to the way our patients access the dental building. Although our main entrance will be open there will be no handicapped parking directly outside our main entrance. Handicapped parking will be available in our main parking lot located on the NE corner of 30th and Webster St. There will be additional covered handicapped parking located under the library just East of the dental school. Access to this lot will be on Burt St. and clearly marked with signs. For all our valued patients who use our main parking lot, shuttles will be available to transport you to and from our main entrance. We look forward to continue serving our patients with the highest quality dental care and we thank you for your patience during this transition period.
